This game is really good, it came out of nowhere and i had never heard of it before and i'm glad i found out about it on the day of release.

It's a roguelike shooter in a great setting and filled with amazing lore, the Lovecraft name isn't just a label on this game, the developers know the Mythos very well and it oozes atmosphere. The gameplay is fast, impactful and very fluid, the enemy design is really cool as well and the weapons feel great!

I would recommend this to anyone who's into rogue-likes/lites and top down shooters, it's amazing!. For my full review please visit:

[And watch my video!. aaawesome!!! cant wait to see 1.0! i feel maximum gen fu already!. Good for 49 cents! \(Only got it for 49 cents because of a coupon\). Dont let the pixel art graphics put you off. A simply brilliant shmup. Puts some other big budget shmups to shame.](#)

[Has that critical one more go addictive quality.](#)

[A must buy if you are into 2D shooters its one of the best on steam and is worth the money even at full price.](#)
